

UNIQUE **S**TYLE **P**LATFORM

ESSENTIAL INSPIRATION FOR CREATIVE MINDS

USP INSPIRE:
ANCIENT GRECIAN

Ancient Greek aesthetics influence **womenswear, menswear** and **lifestyle**, blending art history and mythological references.

Thom Browne's S/S 22 collection featured unisex dresses with **trompe l'oeil** drapery, made up of dozens of layers of tulle built up like a topography of the **human form**.

Christian Dior's recent Cruise 22 campaign video transforms models into **ancient-looking** Greek sculptures in a **dreamy** setting, updated with contemporary clothing and accessories.

Barcelona-based artist **Sergio Roger's** *Textile Ruins* series is a tribute to classical **Greek and Roman** art and architecture. Comprising of **busts** of Roman emperors and **iconic columns** made from 100-year-old antique linen, which Roger painstakingly stitches and drapes to create the appearance of **stone**.
