

UNIQUE STYLE PLATFORM
ESSENTIAL INSPIRATION FOR CREATIVE MINDS

USP INSPIRE:
FUTURE GLOW

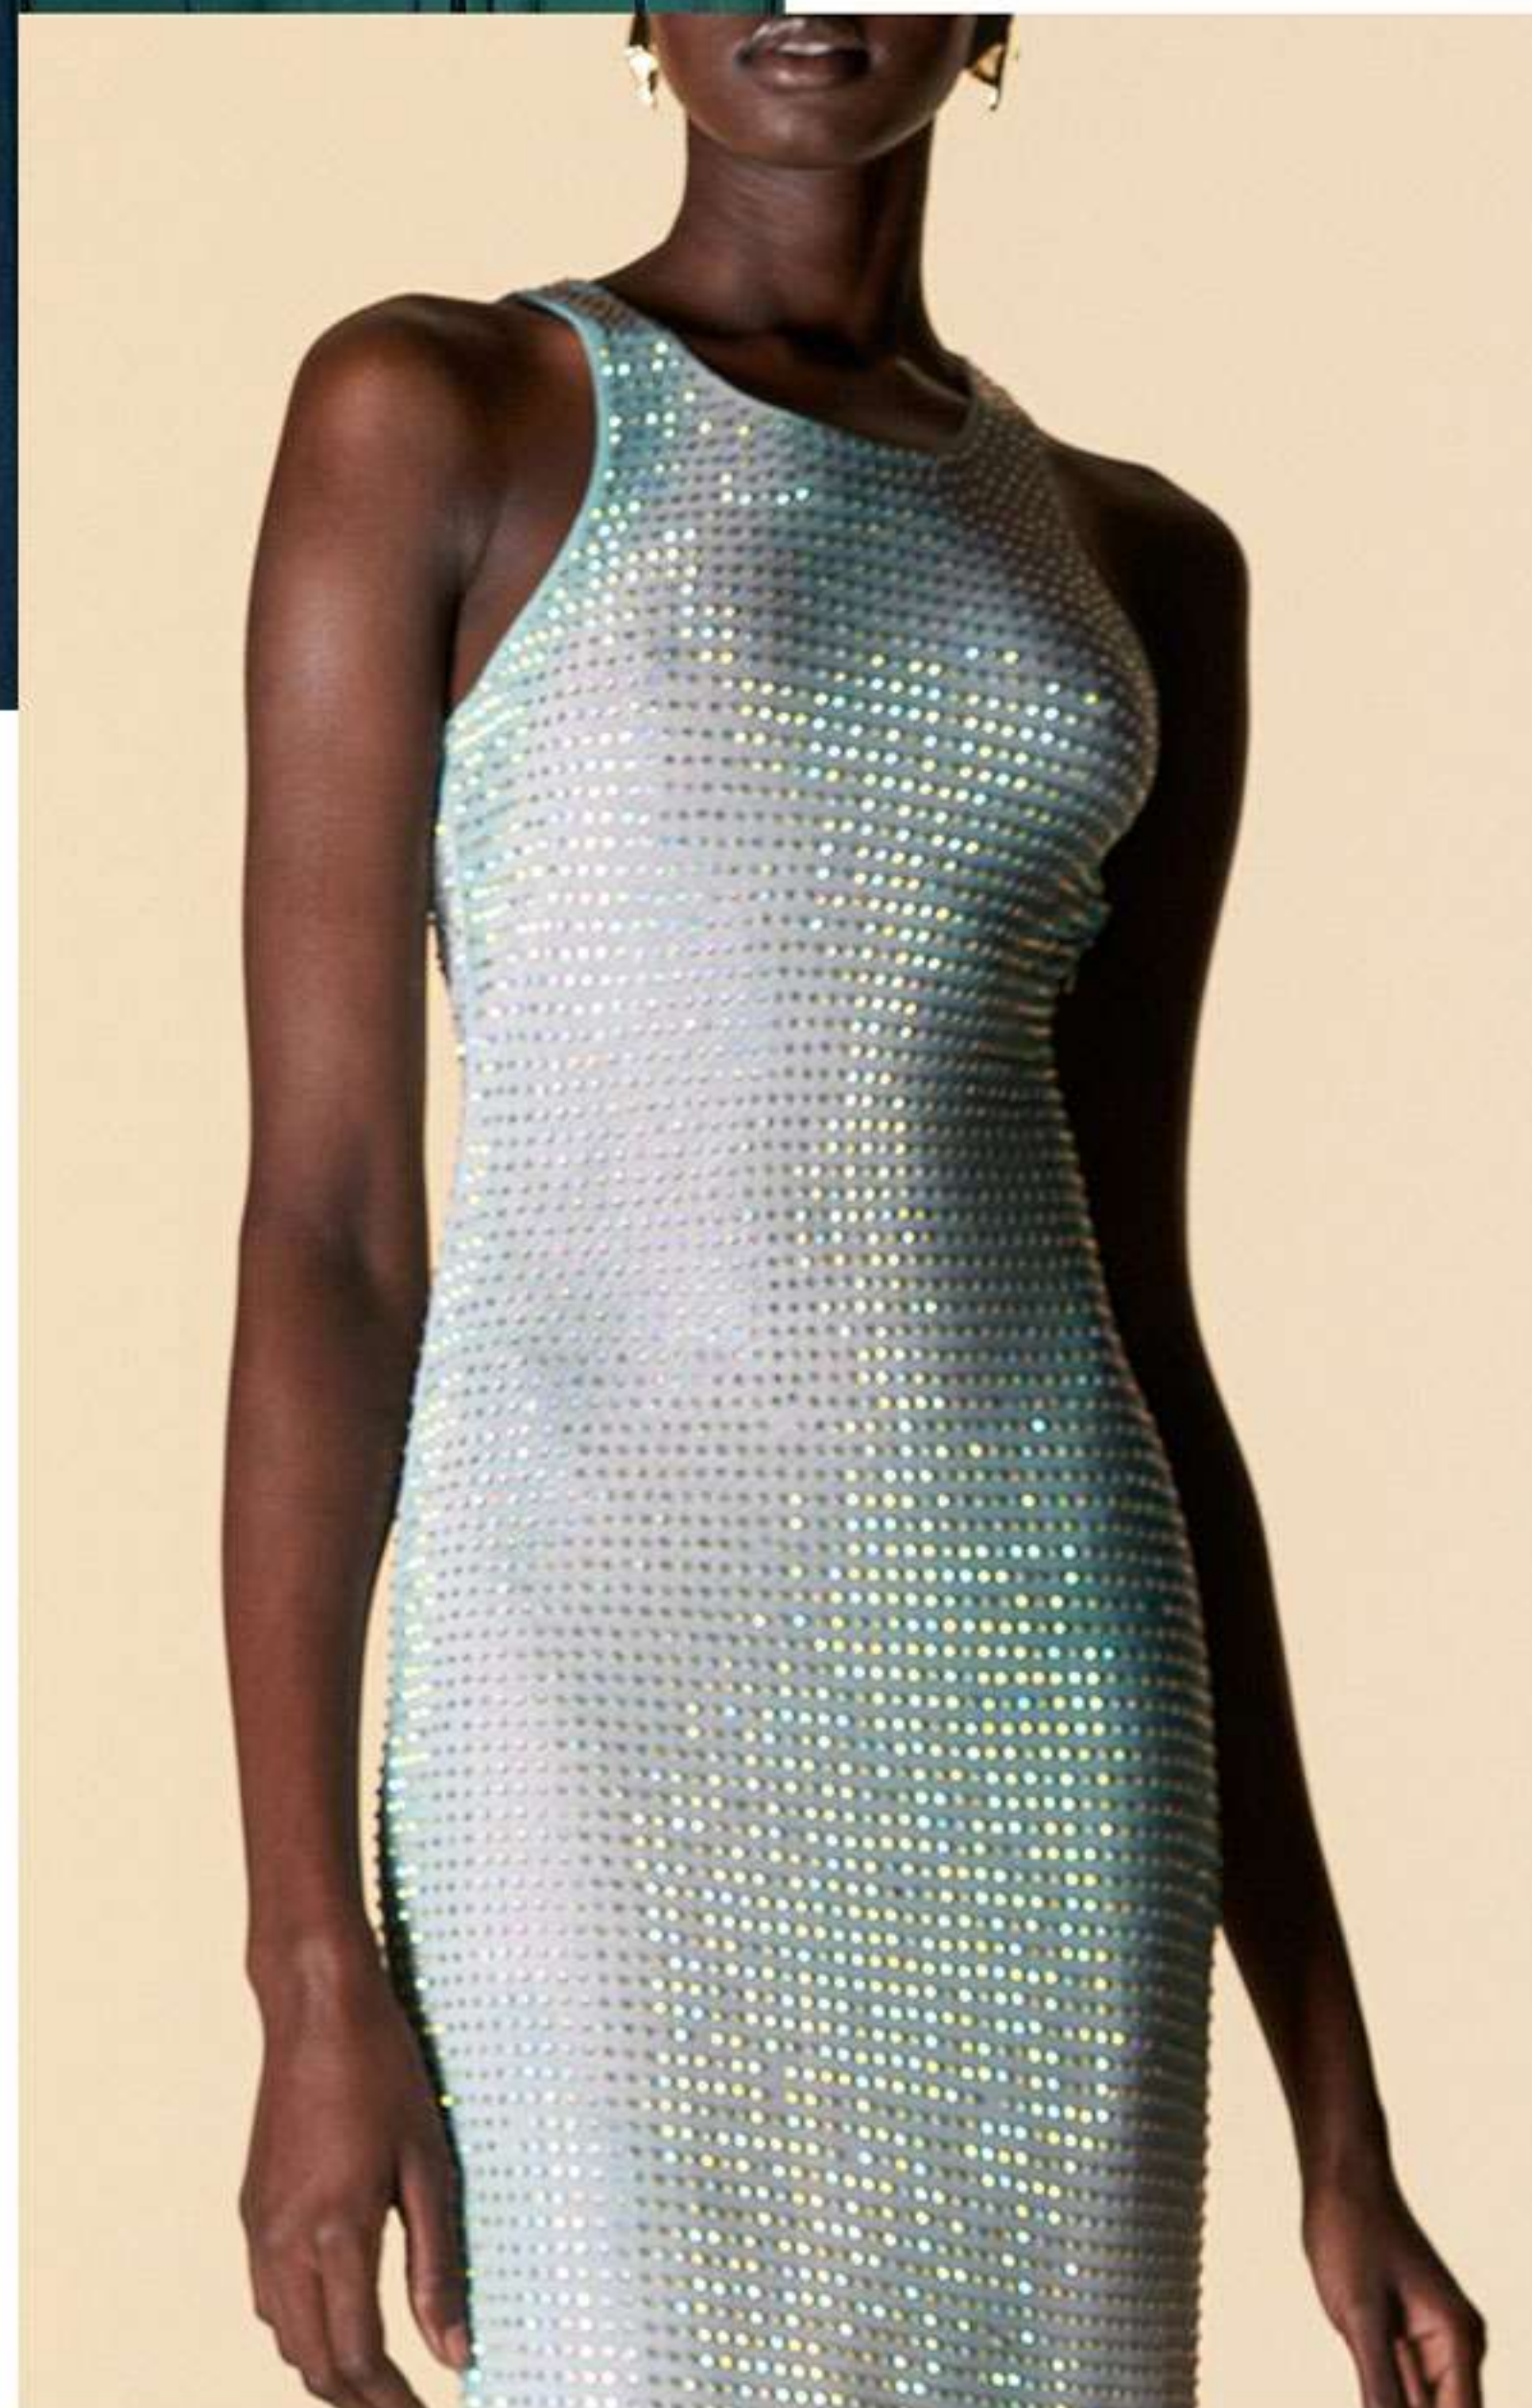

As **online worlds** and the **Metaverse** continue to evolve, the lines between the **digital and physical** become increasingly blurred. IRL objects, garments and surfaces replicate a **futuristic glow** and it becomes harder than ever to know what is real and what isn't.

The work of **Audrey Large**, shown as part of the **Nilufar Depot** showcase during **Milan Design Week 2023**, uses 3D printing to create otherworldly objects that have a radiant shine.

In fashion, designer **Chet Lo** updated his trademark spikey surfaces with glowing lights for his **A/W 23/24** collection, titled *Bioluminescence*.

USP INSPIRE: FUTURE GLOW

MOOD

Be inspired by a tactile yet futuristic mood, featuring glowing metallics, textural fabrics, undulating surfaces and radiant shine
